Professional Summary

Full-Stack Developer passionate about creating intuitive and scalable digital solutions. Strong background in front-end development with React.js and Next.js, and solid experience in back-end development with Node.js and Laravel. Focused on delivering high-quality user experiences and efficient system architectures.

Experience

HR Softwares

PHP Laravel and React

Software Developer | January 2025 - February 2025

- At HR Softwares, I was responsible for designing intuitive and functional user interfaces using Figma, delivering visually appealing and efficient solutions across various company projects.
- I played an active role in front-end development, leveraging frameworks like Laravel and React to build responsive, interactive interfaces and ensure a seamless and engaging user experience.

Alcance Tecnologia CNPJ: 19.892.818/0001-94

PHP Laravel and Angular

Software Developer | October 2023 - February 2025

- Design with Figma: at Alcance Tecnologia, I was responsible for designing intuitive and functional user interfaces using Figma, delivering efficient and visually engaging solutions for company projects.
- Front-End Development with Laravel and Angular: I contributed significantly to front-end development, utilizing frameworks like Laravel and Angular to create responsive and interactive interfaces, ensuring a smooth and enjoyable user experience.

Vinki Corporation

React and NodeJS

CEO | May 2023 - November 2023

- ReactJS Development: at Vinki Corporation, I developed dynamic and highly responsive user interfaces using ReactJS, ensuring an exceptional user experience across our products and applications.
- Node.js Programming: I contributed to building efficient and scalable back-ends and APIs with Node.js, supporting the functionality of our applications.

Projects

Tyra

Next.js and Php Laravel

Web-System

- I designed the platform's user interface using Figma and developed a complete full-stack restaurant system with a login system, using NextJS and Php Laravel to ensure seamless functionality and an optimized user experience.
- Design and Hosting: the platform's design was created using Figma, and it was hosted on Vercel to ensure optimal compatibility with NextJS.
- Demo at [Tyra](#).

Vinki

React.js, Node.js

E-commerce

Github

- Full-Stack E-commerce Development: I built a full-stack e-commerce platform with a login system using ReactJS and Node.js, ensuring seamless functionality and user experience.
- Design and Hosting: the platform's design was created using Figma, and it was hosted on Vercel to ensure optimal compatibility with ReactJS.
- You can explore it at [vinki.vercel.app](#).

Portfolio

React.js

Personal Portfolio

Github

- Personal Portfolio Development: I created my personal portfolio with a dark-soft theme, showcasing my recent projects in a dedicated projects section.
- Technology and Hosting: the portfolio was developed using React Router for route management and is hosted on Vercel.
- You can view it at [antonymazierowarken.vercel.app](#).

Tech Skills

Strong Areas: Design, Front-End

Programming Languages: Javascript, TypeScript

Libraries/Frameworks: React.js, Express.js, Next.js, Typescript, Webpack, Git, Node.js, HTML5, CSS3, Sass

Data Base: MongoDB, Firebase, PostgreSQL, MySQL

Platforms: Vercel, Heroku, Netlify
